#### RONDOUT & OSWEGO RAILROAD FOR SALE.

These Bonis are in good demand and we recommend them as safe and most remnnerative. The popularity of these Bonds is partly due to the fact that the interest is not paid out of capital, as has to be done by some other incipient enterprises. The Hondout and Oswego Radroud Company are doing a prosperous business. The net sarvings of the cond already amount to 10 per cent on all the Bonds to be fasted. Pifts miles are now in operation, and the remaining 50 miles will be opened next Summer, 15 miles being almost faished. The road passes through a rich agricultural district heretofore shut out from railpasses to rough a traffic is, and will be good; while its connections will give it a large through traffic between the Great Lakes and deepwater navigation on the Hudson. The mearness of the Road to this city allows its true condition to be examined and thoroughly known by the bondholder. Be procuring these Bends in exchange for Pive Twestles the successe gets a bond equally sound and eafe; be also adds to his capital cent, while to his income he adds more than 474 per cent,

Davesport, on the opposite bank of the Elver, is connected by a railway height. The last rail of this read was River, is connected by a railway bridge. The fast rail of this read was laid July 7, 1871, and the line is now open and bring operated with a success exceeding all anticipations. In order to place upon the road the large equipment necessary for the business offered, and to construct depots, our and engine-houses, machine-shops, &c., equal to any of the best old roads in the country, as is now required of this, the Company offer, through the undersigned, \$1,500,000 conversible first mortgage gold bonds, which cover the entire property of the Company, and is less than \$17,000 per mile. PRESENT PRICE, 90, AND ACCRUED INTEREST IN CURRENCY. Principal and interest payable in coin at New-York or London, free of tax. Couper payable February and August 1st.
This read, opened for the immense local as well as through traffic

now offered, will prove one of the most problable in the West, traversing as it does a section of country mesurpassed in fertility of sell and agricultural resources, already thinkly populated, and is a high state of cal tivation. This is self-evident, from the fact that every section of the road passes through cultivated fields, and made flourishing towns and vil-lages, with a large city and a navigable river at each end. Rallroads in lages, with a large city and a navigable river at each one. Railrocko in the Wost have been heretofore constructed through masettled and uncultivated regions of the country, consequently have had but little local traffic to depend upon for several years after construction. But the Peoria and Eoch Island Railway is a first-class COMPLETED road, with NO PARALLEL or COMPETING LINE, and RUNS THEOUGH ONE OF THE RICHEST AGRICULTURAL, MANUFACTURING, AND MOST POP-ULOUS DISTRICTS IN THE WEST. Thus it is certain that the local business is already more than enough to sustain the road while the through traffic is unlimited, as its connections are numerous

which can be seen by a glance at the map.

This road is a grand central link, to which many of the principal line. This roam is agreed control of the continent.
